Hidden mounting diagram

## 5.Installation parameters

Calculation formula: frame size =Center distance+track width+two cover plate thickness  
(The center distance and frame size can be adjusted according to requirements)

For example: center distance: 58mm, frame size: 175mm; cover plate thickness:4.5mm  
Then: Frame size 233mm= center distance58\*3 +track width50 +cover plate thickness 4.5\*2

Telescopic 1+3(four tracks) ,single open track

Telescopic 1+3(four tracks) ,double open track

W: Door panel width

L: Track length

X: Overlapping part of two doors

A: Door frame width
